Maintaining, bug fixes and add new features in projects that already made by IBLAZING like 151-151(Call Recording App), Malaka(Restaurant App), GetAround (Find places around you).

Developer Website Profile

Projects Highlights

HappyEMI:

- It is a product of **HyperKonnect Technologies Private Limited** which includes two applications. One for consumers & one for sales persons. HappyEMI is a product through which consumers can buy mobile phones on EMI.

    - **Merchant App**: One sales person will be there in HappyEMI partnered store. When consumer walks in to buy new mobile phone, he will initiate the loan process by asking customer mobile number. He will ask consumer details like PAN NUMBER, ADHAAR NUMBER, PERMANENT ADDRESS etc.. Our RISK TEAM will check customer's credit history & CIBIL score and will take decision accordingly.

    - **Consumer App**: After completing process from Merchant app, consumer has to download this app from Play Store and has to do Bank Verification. He can verify his social media presense which increases chances of his loan approval.

Meet the Doctor:

- Meet the Doctor is an app which provides video call to consult doctor regarding patient's illness. One can book an appointment, can chat and can send lab reports if doctor asks for it.

- Link: You can find APK [here](#).

Adyar Ananda Bhavan(A2B):

- Application for Adyar Ananda Bhavan food chain which provides online food ordering service within 3 km of range. Either you can pay by COD or by online using PayUBiz.

- Link: This project is in beta testing right now. You can find BETA APK [here](#).

Daily haat:

- Daily haat provides facility to order anything from food to bookey on your way. What you just need to do is select item you want to buy, select store, select delivery point, enter arrival time and pay online or COD. Your order will be ready on your way to delivery point.

Daily haat - Shop:

- Daily haat - Shop is the vendor version of Daily haat app. Vendor will have two shop types. Either his shop type will be SHOP or DELIVERY POINT. Delivery Point is something like small shops which are nearby to Main Road from which Customer can easily pickup his order. Vendor whose shop type is SHOP will give order to Vendor whose shop type is DELIVERY POINT if customer has choosen that shop as a delivery point. By serving this, Vendor whose shop type is DELIVERY POINT will get some commision decided by both vendor mutually.
